

## Protegent Antivirus Solution

### **“Think Beyond Anti-Virus, Think Protegent”**

Protegent is deciphered from French Word “Protégée”, which means “TO PROTECT”. As the name suggests Protegent products have been designed to protect your Business, child, data and computer/Laptop.

Unistal has developed advanced amenities that seemingly discards all unwanted/unknown virus threats and make your PC Virus Free!! Protegent Antivirus not only safeguard your PC from all kind malwares but also provides Pro-Active inbuilt data recovery software to ensure no loss of data/ files due to any kind of logical crash or accidental deletion of data/files.

### Components

- **Protegent Antivirus**
- **Crash Proof** - Data Loss Prevention

## Antivirus

Protegent has been infused with Next Generation Technology which helps to detect new threats based on files/Data and URL reputation. Automatic processing of unknown suspicious samples is done at our Protegent™ cloud system after these samples are collected. If a sample is found malicious, automated signatures are generated and immediately rolled out. This blocks unknown threats before they impact your pc and improves the overall efficiency to detect.

## Key Features

- Smart Code Emulations
- USB Threat Protection
- Zero day Malicious URL Protection
- Anti -Ads Protection
- Anti-Phishing Protection

## Benefits

- Protection against Adware/PUP (Potentially Unwanted Programs)
- Low Foot Prints
- Speed up your PC

**Descriptions**

<p><b>Smart Code Emulations</b></p>	<p>Protegent strength lies in proactive detection of known and unknown threats by means of complex definitions of malicious behavior by using Smart Code Emulation signatures &amp; neural networks. A single signature can detect and block thousands of known and unknown threats before they emerge. There entire process is done without any impact on your system resource.</p>
<p><b>Anti-Ads Protection</b></p>	<p>With Protegent anti-ads protection, most of the Ads are blocked and removed before data is downloaded to your computer. This helps to increase faster uploading &amp; downloading and thereby saving your bandwidth.</p>
<p><b>USB Threat Protection</b></p>	<p>Protegent malware team has implemented Neural Smart Scan which protects system from unknown USB threats. When a USB is infected with malware, it usually creates short cuts and hides the data inside it. Protegent has adapted to a different and advanced approach to clean such infected USB drives.</p>
<p><b>Web Control</b></p>	<p>Protects against online risks and blocks Internet clutter.</p>
<p><b>Zero day Malicious URL Protection</b></p>	<p>Malicious URL Protection provides another layer of protection against command and control, botnet's and suspicious links. If any malicious URL communication is detected, the communication is aborted and a warning block message "blocked" is displayed to the user.</p>
<p><b>Anti Phishing Protection</b></p>	<p>Protegent encourages online shopping and provides protection against fake phishing sites. Protegent anti-phishing adds one more layer of protection. When a user's computer attempts to access a URL, it will be compared against DenySense.net system of known phishing sites. If the fake URL is found, connection to the URL is aborted and a warning message "blocked" is displayed. Our database contains millions of phishing websites and is regularly updated. With Protegent™ you are protected from scams with more comfortable and safer online shopping.</p>

<b>Speed Up Your PC</b>	Forget system slowdown situations with bloat ware products. With Protegent™ Speed always Thrills! We build what you always need, very light on your system resources and you don't even notice it's running in the background & protecting you.
<b>Low Foot Prints</b>	Newly created signatures are packed together and regularly released to our users in the form of a Threat Signature Foot Print DB Update. These updates are rolled out on an hourly basis, 24-7-365 days which keep Protegent up-to-date.
<b>Protection against Adware/PUP (Potentially Unwanted Programs)</b>	Protegent take down all Adware/PUP's which overloads your pc and compromise your privacy. Protegent Threat Research team is continuously tracks growing numbers of Adware/PUP's. There are several types of signature definitions to detect the outnumbered Adware/PUP's which uses our built in technology of Smart Code Emulations and other sources like sample exchange or active honey pots.
<b>Hourly update</b>	Protegent Antivirus software is updated every hour and protects our system from new viruses.
<b>Setting Protection</b>	Protects your Protegent settings with a password, so that no one can change or modify the settings even if the other user has the admin rights.
<b>Active Optimization</b>	Maximize operating performance & initiates high speed of analysis and spontaneous response to the attackers.

### Crash Proof

**Crash Proof** is proactive data recovery software that helps users to recover/restore any lost data/files in a matter of time. This software is designed to keep the images of the file indexes/disk properties and keeps on updating them at regular intervals. In this business /organization world the data volume has raised so much that computer dependency has reached to high. As the dependency grows, downtime increases as well. The reason for increase in downtime is due to data loss which cost us more than the recreation cost. Data recovery doesn't provide you satisfactory result every time. So the users have requirement of software that can help users to keep the image of the data. Crash proof takes the image of your data on regular

intervals and this information is stored in a protected area. Crash Proof uses these images to track the lost/deleted files. Users can recover their lost files with the help of this software and can un-format any lost drive.

**Features:-**

<b>Deleted file/ folder recovery</b>	This software supports deleted file /folder recovery. It can recover the deleted/ lost files if they are deleted from your PC even if they are not present in recycle bin.
<b>Unformat formatted drives</b>	The software can even Unformat the whole drive. With the help of this product the user can revive the file system from its replica, which is stored in some other location of the hard disk.
<b>Repair Corrupted / Deleted Partition</b>	With this software you can repair or build back the corrupted/ deleted partition, which may occur due to virus attacks or accidental deletion.
<b>Revive incase of FAT/MFT Corruption.</b>	The software has a feature to build back your FAT/ MFT file system. It supports 100% recovery in case your file system gets corrupt.

**System Requirements**

**Processors**

Intel or AMD x32 or x64

**Supported Operating Systems**

Windows XP (SP 2), Vista (SP 2), Windows 7, Windows 8, 8.1 & 10, Windows Server 2003 and 2008

**Net Framework 2.0**

Required for Network Update server

**Memory Consumption**

40 MB

**Free Disk Space**

120 MB

**Experience a brighter tomorrow .....Today**
